Intellinav One Quick Start Guide

Part number#IN-KQG01

Safety warnings

When using the **Intellinav One**, make sure you are operating the device in compliance with all local, state, and federal regulations. It is the sole responsibility of the driver of the vehicle to operate the vehicle in a safe manner and not become distracted by the **Intellinav** system. You should not operate the controls of the **Intellinav** system while driving, nor place the device where it obstructs airbags operation. Netropa shall not be liable for any accident.

Please review additional information on page 13 of this guide. For full safety and regulatory information, please refer to the *User's Manual*.

- Do not mount where driver's field of vision is blocked
- Do not place on dashboard unsecured
- Do not mount where airbag deployments are obstructed

Quick Start Guide

3

Getting to know the Intellinav One

4

Installing the Intellinav One in your vehicle

Mounting the Suction Cup

1. Press the suction cup firmly against the windshield.
2. Press down the lever to fix the suction cup in place.
3. Press in the circular buttons to unlock the arms.
4. Adjust the angles of the arms to achieve the best viewing position.

Mounting the Cradle and GPS

1. Press the lever to lock or unlock the cradle.
2. Insert the GPS unit bottom in first, and then lock it using the lever on the top.

Charging the Battery

1. Prior to first use, please use the wall charger to fully charge the unit for 4-6 hours until battery LED is green.
2. In vehicle, you may plug the car charger to provide continuous power. On a full charge, the unit can operate up to 5 hours.

Starting the Intellinav One for the first time

To start the Intellinav system:

1. Press the <<POWER>> button. The main menu screen appears.
2. Tap **Navigation**. A warning screen appears.
3. Tap **I Agree** after you have read and agreed to the warning. The map view appears and you are ready to set your first destination!

Reading the map screen

The map view shows you the present location. The bottom of the screen displays the name of the street you are on, and your current speed.

The intellinav map shows you more than just your current location. As you navigate to a destination, the map displays the direction of your next turn, the distance to that turn, and the name of the street you will be turning at the top of the screen.

Entering data on the the Intellinav system

When the system requires that you enter data, a screen of alphabets appears. You can then enter data by tapping these screen buttons.

As you tap the buttons on the keyboard, the list at the top of the screen scrolls to show the next item that matches the letters you've tapped. You can only choose from items that appear on the list.

If you need to enter numbers, tap the **1 2 3** button, and the numeric keyboard appears:

Getting a GPS signal

To use the **Intellinav** system to guide you to a destination, the system's GPS antenna must be receiving signals. GPS signals can be obstructed by ceilings, trees, heavy clouds, and nearby tall buildings. Signals can also be obstructed by the roof of your vehicle. For best results, position your **Intellinav** system where it has a clear view of the sky.

You need to receive data from four satellites to get an accurate location. Intellinav provides a GPS Info screen that tells you, among other things, how many satellite signals you are currently receiving. The SAT field on the GPS info screen shows the number of satellite signals that you are currently receiving (9) and an estimate as to how many are in view (10)

To check the status of your GPS signal:

1. Press **Menu**. The main menu appears.
2. Tap **GPS Info**. The GPS Info screen appears.
3. To close the GPS Info screen, tap the arrow in the upper right corner.

Planning a route

There are six different ways to set your destination. In this guide we'll just show you how to enter an address, starting with the street name, and let you explore from there.

To enter an address as a destination:

1. Press **Menu**. The main menu appears.
2. Tap **Destination**. The Set Destination screen appears.
3. Tap **Address**. The Input Method screen appears.
4. Tap **Street First**. The Enter Street Name screen appears.
5. Tap the letters to enter the name of the street. Tap **OK** when you have selected the street. The Enter House Number screen appears.

6. Tap the numbers to enter the house number. Tap **OK** when you have finished. The Select Address screen appears.

7. Select the address that matches the location you want to go to and tap **Nav.** The map appears, and the guidance directions begin.

Note: If for some reason you cannot follow an instruction from the guidance directions, the **Intellinav** system will automatically recalculate your route and provide new directions.

Other ways to plan your route

The other ways to plan your route include:

- Intersection
- Points of Interest (POI)
- Favorites
- Recent
- City Center

You can also create itineraries of up to 100 destinations. Once you have added the destinations you can re-order the list. Please see the *User's Manual* for details.

Other features

You can customize the features of the **Intellinav** system to make your navigation experience even better. The options you have include:

- Display options

- Route options

- Speed alert

- Localization

Additional Information

All the features of your Intellinav One are fully explained in the User's Manual included. For complete information please refer to it.

***NOTICE TO DRIVERS IN CALIFORNIA AND MINNESOTA:** State law from these states prohibits drivers of any motor vehicle from placing, displaying, affixing and or applying any objects such as suction mounts on the windshields. Other dashboard or friction mounting options should be used. Intellinav does not take any responsibility for any fines, penalties, or damages that may be incurred as a result of disregarding this notice.

California Vehicle Code Section 26708(a)

Minnesota Statutes 2005, Section 169.71

The utmost care was given in preparing this guide. Constant product development may sometime lead to outdated information presented in this manual.
